EDUCATION

International Institute of Information Technology, Hyderabad (IIITH)

Aug 2022 – May 2026

Bachelor of Technology in Computer Science & Engineering with Honors

Hyderabad, India

Relevant Coursework: Data Structures & Algorithms • Database Management Systems • Operating Systems & Networks • Software Engineering • Design Thinking • Distributed Systems • Information Security • User Interaction & Usability of Digital Products • Internet of Things • Computer Systems Organization • Principles of Programming Languages

EXPERIENCE

Site Reliability Engineer | Chubb

Jul 2026 – Present

Full-Stack Engineering, AI Systems & Observability Training

Hyderabad, India

- Completed hands-on full-stack engineering training covering **C#/.NET, Angular, TypeScript, Microsoft SQL Server (MSSQL)**, REST APIs, application architecture, debugging, and end-to-end feature development.
- Built and explored AI-enabled applications through training on **Claude, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP)**, prompt engineering, and integrating LLM capabilities into software workflows.
- Currently exploring enterprise **observability and application performance monitoring** using **Dynatrace** and **OpenTelemetry**, learning distributed tracing, telemetry collection, metrics, logs, and service-level monitoring.

Google Summer of Code Contributor & Mentor | Joomla! CMS

May 2025 – Present

Open-Source Full-Stack Development & Technical Mentorship

Global Open Source

- Engineered the official **Joomla! Workflow Graph Editor**, replacing a complex multi-page administrative workflow with a unified interactive interface using **Vue.js**, JavaScript, PHP, REST APIs, and Joomla Framework components.
- Designed reusable frontend and backend components, integrated APIs, debugged issues, reviewed pull requests, and shipped production-ready features through **Git** and automated CI workflows.
- Selected as a **GSoC 2026 Mentor** after delivering two concurrent projects ahead of schedule, mentoring contributors through architecture discussions, code reviews, debugging, and implementation decisions.

Undergraduate Researcher | SERC Lab, IIIT Hyderabad

Apr 2024 – May 2026

Full-Stack Development, ERP Systems & Human-Centered Software

Hyderabad, India

- Developed and enhanced modules for an institutional ERP system used by **4,000+ daily users**, working across frontend interfaces, backend workflows, data handling, and iterative feature development.
- Built reusable **React** components and streamlined more than 10 administrative workflows through usability testing, accessibility reviews, and iterative engineering improvements.

Software Engineering Intern | Virtual Labs

Jan 2024 – Apr 2024

Web Application Development, APIs, Developer Tooling & CI/CD

Hyderabad, India

- Architected and developed a **VS Code Web Extension** using **TypeScript**, Node.js, Webpack, and extension APIs, streamlining experiment authoring workflows used by more than 1,000 students and educators.
- Integrated application APIs and automated testing and deployment workflows with **GitHub Actions**, debugging cross-browser issues and collaborating with stakeholders to deliver more than 10 product improvements on schedule.

Web Administrator | IT Office, IIIT Hyderabad

Aug 2023 – May 2026

Web Infrastructure, Deployment & Production Troubleshooting

Hyderabad, India

- Maintained university web applications serving **1,000+ daily users** using Linux, Nginx, Caddy, PM2, PostgreSQL, SSL/TLS, and automated deployment and health-monitoring workflows.
- Diagnosed and resolved **10–30 technical issues monthly**, including backend failures, routing problems, database issues, and performance bottlenecks while maintaining service continuity.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Python, C#, C++, C, SQL, PHP, Bash
- Frontend:** React.js, Angular, Next.js, Vue.js, Redux Toolkit, Tailwind CSS, Vite, Webpack
- Backend:** Node.js, Express.js, ASP.NET Core, FastAPI, Flask, REST APIs, GraphQL, WebSockets, Microservices, JWT
- Databases:** PostgreSQL, MongoDB, Microsoft SQL Server (MSSQL), MySQL, Redis, Supabase
- AI & Observability:** Claude, RAG, MCP, Dynatrace, OpenTelemetry, Distributed Tracing, Metrics, Logs
- DevOps & Tools:** Git, GitHub Actions, Docker, Linux/Ubuntu, Nginx, Caddy, Postman, PM2, CI/CD

PROJECTS

CanteenX – University Multi-Vendor Ordering Platform

[Source Code](#)

React.js, TypeScript, FastAPI, PostgreSQL, GraphQL, WebSockets, Razorpay

Full-Stack Application

- Built a production-style full-stack ordering platform using **React**, TypeScript, FastAPI, **PostgreSQL**, GraphQL, WebSockets, and role-based authentication for students, vendors, staff, and administrators.

- Implemented complete application workflows covering catalog browsing, server-side pricing, cart management, stock validation, checkout, order lifecycle tracking, vendor operations, and administrative reporting.
- Integrated **Razorpay** with server-side signature verification and idempotent webhooks, ensuring payment confirmation is validated by the backend rather than trusted from the client.
- Implemented real-time order updates and notifications through GraphQL subscriptions over WebSockets, while using GitHub Actions for linting, type checks, migration validation, and automated tests.

ShopFlow – Distributed E-Commerce Platform

React, Python, REST APIs, RabbitMQ, Docker, Redis, PostgreSQL

[Source Code](#)
Distributed Full-Stack System

- Architected a distributed e-commerce application with a **React** dashboard, **REST APIs**, PostgreSQL-backed services, RabbitMQ messaging, Redis, Docker Compose, and multiple asynchronous consumers.
- Implemented event-driven order processing for payment, inventory, notifications, and logging, using retries, dead-letter handling, health checks, and message recovery to improve application resilience.
- Built operational dashboards for queues, consumers, throughput, failures, and service health, enabling rapid debugging and diagnosis of distributed application behavior.

PlaceTrack – Campus Placement Navigator

React.js, Node.js, FastAPI, PostgreSQL, Tailwind CSS

[Source Code](#) | [Live Demo](#)
Full-Stack Web Portal

- Developed an end-to-end placement management platform using **React**, **Node.js**, FastAPI, and **PostgreSQL**, supporting student, recruiter, scheduling, and analytical workflows.
- Designed relational database queries and backend APIs for resume tracking, interview scheduling, eligibility filtering, and placement analytics while building responsive frontend dashboards.

PlantIQ – Smart Crop Monitoring Platform

React.js, Node.js, Flask, ThingSpeak, OM2M, REST APIs

[Source Code](#) | [Live Demo](#)
IoT Full-Stack Platform

- Developed a full-stack sensor monitoring platform using **React**, Node.js, Flask, and REST APIs to process real-time telemetry and identify plant stress, water requirements, and nutrient imbalances.
- Integrated external telemetry services and sensor APIs to collect, process, and visualize live environmental data, generating proactive alerts for agricultural monitoring.

NFSDrive – Distributed Network File System

C, TCP Sockets, POSIX Threads, Concurrency

[Source Code](#)
Systems Programming

- Built a distributed file system in C using TCP socket programming, multithreading, synchronization, and client-server communication, providing fault-tolerant file operations with consistent shared state.

Institute Management System Redesign

Figma, React UI Prototyping, Human-Centered Design, Usability Testing

[Figma Prototype](#)
ERP Product Design

- Redesigned legacy institutional ERP workflows using user research, task analysis, accessibility evaluation, and high-fidelity React interface prototypes, prioritizing simpler and more maintainable user flows.

ADDITIONAL PROJECTS

Additional Full-Stack & Systems Repositories

[GitHub](#)

- TourismToolKit • Conference Booking API • Digital Library System • BlogNest • Finance Learning App • VoteArena • Trendify • ChatWrap • FaceClone • Mess Inspection Tool • SplitMate • LifeBook • TimeTrack • MusicMania • ManagePEC • IIITH WebHunt • Enhanced Xv6 Shell • MiniShell • ConnectedCar • GridWatch

ACHIEVEMENTS & LEADERSHIP

- Selected as **Google Summer of Code 2026 Mentor** and **GSoC 2025 Contributor** for Joomla! CMS, contributing to open-source software and getting insights from international community and mentoring international contributors.
- Achieved a peak rating of **1300+ (Pupil)** on Codeforces, showing strong algorithmic problem-solving and debugging skills.
- Served as a **Teaching Assistant** for Software Systems, User Interaction and Usability of Digital Products at IIITH.
- Led technical and community initiatives as **Head of Web & Social Media** for NSS-IIITH, coordinating web development and digital campaigns. Led Events like Blood Donations, Tree Plantations, Campus Cleaning Activities etc
- Awarded a **District-Level Silver Medal** in the International Mathematics Olympiad for mathematical reasoning and analytical problem-solving.
